

Money Market Account

Better. Simpler. Easier.

The best of both worlds

With your money market account, your money grows faster than in a traditional savings account. Plus, you have the liquidity of a savings or checking account. Here's how it gives you the ultimate in convenience and earning power:

- Interest is calculated daily and credited to your account each month.
- Your earning power increases as your balance increases. Interest is based on five tiered balances.
- You may make a designated number of withdrawals or transfers per statement cycle, some of which may be by checks and ATM card. Deposits may be made as often as you like. See a personal banker for details.

Plus! Because your money market account is a money management tool, we pack it with no-cost features for your convenience.

- 24-hour Internet Banking
- 24-hour Free Online Bill Pay
- 24-hour Phone Access Line (PAL)
- E-Statements (account statements delivered by e-mail) or image statements
- ATM card
